ENGINE TREATMENT

Bi-dose 65 ml

exel classic cars is a double integral treatment up and down engine

Bi-dose 250 ml

WHEN TO USE IT?

High tech concentrate from petrochemicals

- Facilitates the starting of the engine after a period of stopping.

Cleans and protects:

- **Low engine** : the lubrication circuit, grinds the grooves and the low segmentation of the engine.
- **High engine** : high segmentation, combustion chamber, injectors, injection system and valves for 20000 km.

- Recommended for vehicles diesel/gasoline over 60000 km.
- Suitable for all low and high pressure injection technology

PROPERTIES

- Recommended for historic vehicles

Recommended for engines:

- 4 cylinder: bi-dose 65 ml
- 6, 8, 12 cylinder : bi-dose 250 ml

NOTICE

- Pour the bottle N°1 into the fuel tank before refueling.
- Pour the bottle N°2 by the oil sump filling port.

ADVANTAGES

- Eliminates deposits in the feed system
- Reduces oil and fuel consumption
- Reduces polluting discharges
- Effectively cleans the dirty parts of the engine (up and down engine)
- Cleans the engine compressions

Made in France
