500 ml

EXEL POWER3[®] FAP

PARTICLE FILTER PREVENTIVE

exel power3[®] FAP is a particle filter cleaner - **500 ml**

WHEN TO USE IT?

The cleaner exel power3[®] FAP is used for diesel engines.

- **Cleans and protects** injectors.
- **Facilite the regeneration of the FAP** more quickly.
- **Reduces** fuel consumption.
- **Reduces** polluting emissions.
- When the FAP is partially clogged, helps the active regeneration.

PROPERTIES

- **Reduces** the combustion temperature of the soot particles.
- **Prevents** clogging of the FAP due to the accumulation of partially unburned particles
- Allows faster temperature rise **to start the active regeneration** (especially over the urban courses).
- **Avoids** the replacement of the FAP.
- **Makes it easier to burn and destroy** the fouling retained inside the filter.
- **Prolong** the life of the FAP;

ADVANTAGES

- **Uses regularly, it avoids maintenance and costly disassembly.**
- **Strongly advise before technical control**
- **Improves engine performance**

■ Made in France

USAGE TIPS

- Pour the 500 ml into the fuel tank before refueling.
- Make a minimum 60km extra-urban route or better, make a minimum of 40km of motorway at a high level.
- Drive to exhaustion of fuel.

USE PRECONIZATIONS

In case of mainly road or motorway use, repeat the operation every 10 000 km.

In case of mainly urban, repeat the operation every 5 000 km.
