octane booster[®] Moto

octane booster[®] is an additive to improve the fuel octane number and therefore engine performance.

WHEN TO USE IT ?

in sport or current use.

PROPERTIES

- Do not attack the fuel filter.
- Improves the response time of the motor to acceleration.
- Removes rattling that is present in this phase.

ADVANTAGES

- Increases the octane number
- Increases engine performance

🇫🇷 Made in France

NOTICE

Recommended dosage :

- For sport use:
1 bottle of 50cc treats 10 liters of fuel
For a result of a 3 point increase in the octane number
- For current use:
1 bottle of 50cc treats 20 liters of fuel
For a result of a 2 point increase in the octane number
Effective during 2 full of fuel.
Do not wait until the fuel runs out to fill the second tank.
