exel power3[®] Gasoline - Diesel 50 ml

EFFICIENT CLEANER AND PROTECTION FOR INJECTORS AND VALVES

ADVANTAGES

- Rebalances injector flow
- Reduces over consumption
- Reduces polluting discharges (up to 30%)
- Improve fuel combustion (fuel spraying effect)
- Improve the performance of the engine (power)
- Effective 7500km

WHEN TO USE IT ?

PREVENTIVE ACTION- 50 ML – From 20 000 km.

PROPERTIES

Detergent

- Cleans and keeps the engine and fuel system clean up to the combustion chamber.
- Reduces fuel consumption.
- Reduces emissions by up to 50%.
- Improves engine efficiency and cold start.
- Restore the compressions.

Demulsifiant

- Facilitate the separation of water (accidentally introduced in the tank of fuel)
- Very important especially for HDI and common rail engines.

Anti-corrosion

- Protects the metal parts of the fuel system against rust and corrosion.
- Thus limits the friction and prevents any new deposits.

Anti-usure and anti-friction

- Prevents eizing of injection pumps (diesel).
- Decreases the friction of moving parts (valves, segments).
- Reduces the wear of metal parts

Booster Octane

- Facilitates and improves combustion.
- Improve the octane indice.
- Improves engine efficiency.

NOTICE

Pour the contents of the bottle into the fuel tank before refueling.

 Made in France

RÉF. ESSENCE : 52000 - RÉF. DIESEL : 5300
